

## CONGRATULATIONS BYUNG YOON KIM!

Thank you for your excellent work on AI-powered sales tools, including daily corporate customer news, the Startup Investment alarm, and especially the new Corporate Finder("CorpFinder"). The CorpFinder brilliantly showcases how these solutions are built on Google Cloud. Your consistent career development and talent have significantly eased the lives of other Googlers, demonstrating the potential to replace third-party solutions by centralizing Google native technology. You've successfully shown how to develop Agentic AI using A2A, ADK, CLI, Gemini Code Assistant, and more. Your work is exactly what we need to demonstrate AI's practical application in our daily operations.
